

# Overview of the AUREP: Advanced University Reciprocating Engine Program

Presented by  
Dr. Bryan Willson, Colorado State University  
on Behalf of the  
Academic Advisory Board  
of the AUREP

Peer Review of ARES Reciprocating Engine Program  
DOE Distributed Energy Peer Review  
Washington, D.C.  
December 2-3, 2003

# Outline

- **The AUREP Research Program**
- **Selected Results to Date**
- **The Academic Advisory Board**
- **Academic / Industry Linkages**

# ARES Program Goals & Barriers

## Program Goals:

### Efficiency:

50% electrical generation efficiency

### Emissions:

0.1 gm/kw-hr NOx

### Economics:

reduce life-cycle cost of power generation by 10%

## Barriers:

### Identified through:

- Roadmapping workshops
- Industry consultation
- Precompetitive research efforts

### Used to guide university solicitation

### Initial focus areas:

- Improved ignition for high-bmep lean-burn engines
- Reduced mechanical friction
- Improved exhaust aftertreatment

# University Reciprocating Engine Research

**Managed For**  
**Office of Power Technologies/Office of Energy Efficiency and Renewable Energy**

Tom J. George, DOE/NETL Project Manager  
Ronald Fiskum, DOE/EERE Program Sponsor

**COOPERATIVE AGREEMENT with TEN UNIVERSITIES**  
**\$6,4712,000 Total Contract Value (\$5,392,700 DOE)**

# 12 AUREP Projects: 10 direct, 2 “special status”

- **Fundamental Studies of Ignition Processes in Large Natural Gas Engines Using Laser Spark Ignition**  
*Colorado State University*
- **Low Engine Friction Technology for Advanced Natural Gas Reciprocating Engines**  
*Massachusetts Institute of Technology*  
*Colorado State University*
- **Ignition Improvement of Lean Natural Gas Mixtures**  
*Michigan Technological University*
- **Two Stage Catalytic Reduction of NOx**  
*Ohio State University*
- **Corona Discharge Ignition for Advanced Stationary Natural Gas Engines**  
*University of Southern California*
- **Reduced Engine Friction and Wear**  
*University of Texas at Austin*
- **Rail-Plug Ignition System for Enhancing Engine Performance and Reducing Maintenance**  
*University of Texas at Austin*
- **Advanced Natural Gas Reciprocating Engine: Parasitic Loss Control Through Surface Modification**  
*Purdue University*
- **Selective NOx Re-Circulation for Stationary Lean-Burn Natural Gas Engine**  
*West Virginia University*
- **Energy Thermal Management via Active Flow Control**  
*University of Tennessee*
- **\*Improvement to Pipeline Compressor Engine Reliability Through Retro-Fit Micro-Pilot Ignition System**  
*Colorado State University*
- **\*Catalyst Studies**  
*University of Maryland*

\*Special status – funded through other DOE programs

# 5 AUREP Ignition Projects

**Goal: To help overcome ignition-induced barriers to high efficiency, high reliability, and low emissions**

**Ignition Improvements of Lean Natural Gas Mixtures**

Dr. Duane Abata  
Dr. Jason Keith  
Prof. Lee Oberto  
Interdisciplinary Center for Advanced Propulsion  
Chris Henning  
Dave Horstman  
Kirk Opella

Michigan Technological University  
Houghton, Michigan

**Colorado State University**  
Engines & Energy Conversion Laboratory

**Fundamental Studies of Ignition Process in Large Natural Gas Engines Using Laser Spark Ignition**

Dr. Bryan Wilson, Principal Investigator  
Tom J. George, Project Manager, DOE/NETL  
Ronald Fiskum, Program Sponsor, DOE/EERE

Cooperative Agreement DE-FC26-02NT41335  
Awarded 5/1/02, 24 months  
\$736,839 Total Contract Value (\$502,000 DOE)

WOODWARD  
DRESSER  
Waukesha

Colorado State University  
Knowledge to Go Places

**University of Southern California**

**Corona Discharge Ignition for Advanced Stationary Natural Gas Engines**

Paul D. Ronney, Principal Investigator, USC/AME  
Tom J. George, Project Manager, DOE/NETL  
Ronald Fiskum, Program Sponsor, DOE/EERE

COOPERATIVE AGREEMENT DE-FC26-02NT41336  
Awarded 4/1/03, 36 Month Duration  
\$710,491 Total Contract Value (\$560,491 DOE)

NETL

**The University of Texas**

**Railplug Ignition System for Enhancing Engine Performance and Reducing Maintenance**

Ron Matthews, Principle Investigator  
(Matt Hall and DK Ezekoye, Co-PIs)  
Tom J. George, Project Manager, DOE/NETL  
Ronald Fiskum, Program Sponsor, DOE/EERE

COOPERATIVE AGREEMENT DE-FC26-01NT41334  
Awarded 9/30/01, 36 Month Duration  
\$670,481 Total Contract Value (\$491,460 DOE)

Waukesha

**Retrofit of Micropilot Ignition for Pipeline Engines**  
April 9, 2003  
Morgantown, W. Va.

Funded through other  
DOE programs

# 5 AUREP Ignition Projects

A graphic for the Colorado State University Engines & Energy Conversion Laboratory. It features a dark background with a red horizontal bar at the top. A bright, glowing spark is shown in the upper right corner. The text is in various colors: green for the university name and project title, yellow for the investigators and sponsor, and white for the agreement details. Logos for Woodward Dresser Waukesha, the Department of Energy, and Colorado State University are at the bottom.

# 3 AUREP Friction Projects

## Purdue University Parasitic Loss Control Through Surface Modification

Principle Investigator: Farshid Sadeghi, Ph.D.

Tom J. George, Project Manager, DOE/NETL

Ronald Fiskum, Program Sponsor, DOE/EERE

COOPERATIVE AGREEMENT DE-FC26-02NT41340

Awarded (4/1/2002, 36 Month Duration)

Total Contract Value: \$575,317 - DOE Share: 459,41

Purdue Cost Share: \$115,903

Purdue University

Tribology Laboratory

# 3 AUREP Friction Projects

## *The University of Texas* Reduced Engine Friction and Wear

Ron Matthews, Principle Investigator  
(Mike Bryant and Tom Kiehne, Co-PIs)

Tom J. George, Project Manager, DOE/NETL  
Ronald Fiskum, Program Sponsor, DOE/EERE

**COOPERATIVE AGREEMENT DE-FC26-01NT41337**

Awarded 9/30/01, 36 Month Duration  
\$755,637 Total Contract Value (\$557,689 DOE)

Wednesday, April 9, 2003

# 4 AUREP Aftertreatment Projects

Goal: To support ARES emissions goals by removing barriers to effective aftertreatment

**Selective NOx Recirculation Project**

**Principal Investigator**  
Tom J. George, Project Manager, DOE/NETL  
Ronald Fiskum, Program Sponsor, DOE/EERE  
Industrial Partner  
Battelle Technology Corporation  
**Project Team**  
Dr. Nigel Clark, Dr. Gregory Thompson,  
Raghu Nino, Kristina Azevedo, Chandra Tawara

COOPERATIVE AGREEMENT DE-FC26-02NT-41608  
Awarded (10/01/2002, 36 Month Duration)  
\$769,813 Total Contract Value (\$699,297 DOE)

**The University of Tennessee**  
Energy Efficient Thermal Management of Natural  
Gas Engine After treatment Via Active Flow Control

**Principal Investigators**  
David K. Brink  
Ka Nguyen

Tom J. George, Project Manager, DOE/NETL  
Ronald Fiskum, Program Sponsor, DOE/EERE

COOPERATIVE AGREEMENT DE-FC26-02NT-41608  
Awarded (10/01/2002, 36 Month Duration)  
\$750,000 Total Contract Value (\$600,000 DOE)

**Ohio State University**  
Two-Stage Catalytic Reduction of NOx

Went S. Oakes, Principle Investigator  
Tom J. George, Project Manager, DOE/NETL  
Ronald Fiskum, Program Sponsor DOE/EERE

COOPERATIVE AGREEMENT DE-FC26-02NT-41608  
Awarded (10/01/02, 36 Month Duration)  
\$760,321 Total Contract Value (\$600,930 DOE)

## University of Maryland

**Principal Investigator**  
Dr. Greg Jackson

Special status:  
Funded through other  
DOE programs

DOE PEER Review, 12-3-03

COOPERATIVE AGREEMENT DE-FC26-02NT41609

Awarded (10/01/2002, 36 Month Duration)

\$750,000 Total Contract Value (\$600,000 DOE)

# 4 AUREP Aftertreatment Projects

## *Ohio State University* Two-Stage Catalytic Reduction of NO<sub>x</sub>

Umit S. Ozkan, Principle Investigator

Tom J. George, Project Manager, DOE/NETL

Ronald Fiskum, Program Sponsor DOE/EERE

**COOPERATIVE AGREEMENT DE-FC26-02NT41608**

Awarded (10/1/02, 36 Month Duration)

\$760,321 Total Contract Value (\$600,930 DOE)

DOE-NETL  
4/9/03-USO

# 4 AUREP Aftertreatment Projects

**University of Maryland**

**Principal Investigator  
Dr. Greg Jackson**

Special status:  
Funded through other  
DOE programs

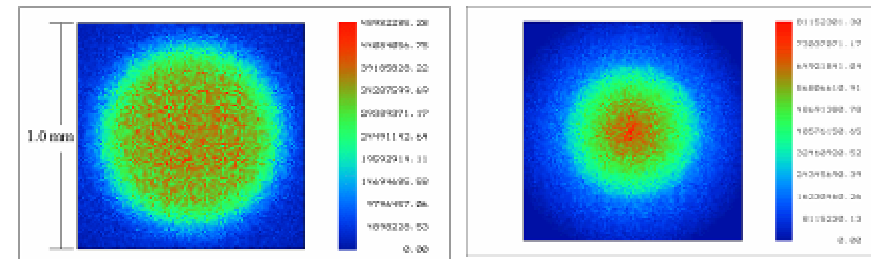

# Selected Results: CSU Laser Ignition (1/3)

- **Original tasks:**
  1. Combustion test chamber studies
  2. Optical engine studies
  3. On-engine studies
  4. Implementation issues, including fiber optic delivery
- **Program developments**
  - Complementary programs also initiated at DOE labs: NETL & Argonne
  - Fiber optic delivery more difficult than originally thought

# Selected Results: CSU Laser Ignition (2/3)

- Some redundancy in optical engine & single cylinder experiments with DOE labs
- Potential major obstacle with fiber optic beam delivery
- Project was refocused to move fiber optic delivery to an earlier high-priority task
- Additional investigators brought in from diverse interdisciplinary groups at CSU
- Partnership formed with another national lab (Oak Ridge National Lab) for optical modeling support
- Several alternative approaches identified

# Selected Results: CSU Laser Ignition (3/3)

- Initial success with fiber optic beam delivery achieved on 11/6/03
- Further fiber optic concepts being evaluated
- Program will move directly to abbreviated CTC phase then on-engine
- Engine installed for the project can support other DOE on-engine tests, if desired

# Academic Advisory Board: Motivation & History

- ARES manufacturers work together to “speak with one voice” on issues of common interest
- University program could be similarly enhanced through coordinated communication
- Program began informally with DOE Ignition Workshop in November '02
- Groundwork by steering committee in January '03
- Program formalized at organizational meeting in April '03

# Academic Advisory Board: Goals

- Facilitate education of university research community on broader engine issues, outside of focused research specialty
- Provides DOE a conduit for University expertise and opinions on critical issues facing engine research and development
- Assists DOE in identifying research needs
- Enhances credibility and generality to University program by establishing standard test conditions and metrics

# Academic Advisory Board: Accomplishments

- **Have provided technical support for 4 specialized DOE/Industry topical workshops on:**
  - Ignition systems: CSU
  - Friction / Efficiency: MIT, Purdue, Univ. of Texas, CSU
  - Catalysts / Aftertreatment: Ohio State, Maryland
- **Convened organizational meeting in April '03**
- **Drafted standard testing conditions / metrics for:**
  - Standard in-cylinder conditions for ignition & friction studies
  - Standard exhaust composition conditions for aftertreatment studies
- **Convened 2-day workshop on ARES-type natural gas engines November 19 & 20**
- **Working with DOE & industry group on implementing an industry internship program**

# Academic / Industry Linkages

- Focused technical exchange during 4 DOE Technology Roundtables
- 1-on-1 industry / university exchange on individual projects
- Formal overview during University review
- Enhanced student interaction through new internship program

Caterpillar

Cummins

Waukesha

# Academic / Industry Linkages

## Educational Benefits

- Most of the 12 projects utilize 2-3 graduate research assistants; many utilize additional undergraduate assistants
- Projects provide “real-world” research experiences for students
- Program provides a valuable source of high-quality engineering talent to the U.S. distributed generation industry
